

Helping you protect your people,
property and business assets

Fire Engineering & Consultancy

Scope of Services portfolio

Life and Fire Safety engineering is always special and unique for every application that it is intended. A refinery, a military installation will have different needs than a high rise building and a metro station.

In the table below you can find a list of specific services that IFIRE offers. If your Life and Fire Safety objectives and needs are not reflected on the items listed below, or your issue is very specific by nature, get in touch with us so we can work out a tailored solution.
